About me

Hello, I am Yoel. I work as Fullstack Developer at consulting, although I focus on Frontend development and also do project management and analysis tasks.

I have a Telecommunications Engineering Degree by the Technical University of Cartagena. Additionally, I have participated actively on other projects as the Teleco LAN Party as coordinator, taking on audiovisual communication, digital marketing, web development and graphic design tasks. I have also worked at the University's Digital Content Production Centre, at web design and development projects as well as web applications focused on gamification applied to teaching.
